Certificate

Certified Passive House component

For cool temperate climates, valid until 31 December 2017

Category: Entry door with glazing

Manufacturer: Topic GmbH

4152 Sarleinsbach, Austria

Product: Topic Passivhaustür

This certificate was awarded based on the following criteria:

Heat losses through the installed entry door:

U-value of the installed door (1.10 m wide by 2.20 m tall):

 $U_{D,installed} = 0.80 \text{ W/(m}^2\text{K}) \leq 0.80 \text{ W/(m}^2\text{K})$

Provided that the installation is carried out according to the certification report, available from the manufacturer.

U-value before installation: $U_D = 0.75 \text{ W/(m}^2\text{K})$.

The U-values were calculated based on glazing with U_g = 0.55 W/(m²K) in accordance with EN 673 and the spacer "TGI Spacer". The glass pane should have a maximum area of 0.42 m² (57 x 73 cm) or a maximum circumference of 3.84 m (13 x 179 cm).

Airtightness:

Airtightness class 4 according to EN 12207.

The airtightness criterion has been fulfilled.

The airtightness test according to EN 1026 was carried out taking into account a maximal deformation of the door leaf, as per EN 1121.

U-value entry door

including the above mentioned glazing with U_q = 0.55 W/(m²K)

 $U_D = 0.75 \text{ W/(m}^2\text{K})$
