C++ Developer

The Passive House Institute is a leading international institution in the field of Passive House research. Our scientific work is supplemented by consulting, certification and quality assurance, organisation of technical conferences, the development of planning tools and public relations work.

We offer a job for a C++ Developer at our main office in Darmstadt:

Your task:

The Passive House Institute is developing a program to convert IFC files into PPP files, which can be used in the Passivhaus Planer Package (PHPP) which is also developed by the Institute. The converter will make it much easier to plan a Passive House, since the data does not have to be transferred from CAD/BIM software into PHPP manually any more.

Requirements:

- Good knowledge of the C++ programming language
- Good understanding of the software version control system Git
- Fluent English

Advantages:

- proficiency in German
- general knowledge of Passive House/energy efficiency concepts

Familiarisation with the Passive House concept and basics is required and will be supported by the Passive House Institute. If you are interested in this position, please send your complete application to:
