

# Table of contents

<b>1</b>	<b>概要</b>	<b>7</b>
<b>2</b>	<b>Executive Summary</b>	<b>9</b>
<b>3</b>	<b>Introduction</b>	<b>11</b>
3.1	The Passive House principle	11
3.2	Passive Houses for China	11
3.3	What to expect from this report	12
<b>4</b>	<b>Choosing Locations</b>	<b>13</b>
4.1	01 - Beijing – The Capital	13
4.2	02 - Shanghai – The Industrial East Coast	13
4.3	03 - Chengdu – The Westernmost of the Great Cities	13
4.4	04 - Kunming – City of Eternal Spring	14
4.5	05 - Guangzhou – The Industrial South Coast	14
4.6	06 - Qionghai – Tropical	14
4.7	07 - Harbin – Cold with Humid Summers	14
4.8	08 - Urumqi – Cold with Dry Summers	14
4.9	09 - Lhasa – A Sunny Mountain Site	14
<b>5</b>	<b>Some General Design Recommendations</b>	<b>15</b>
5.1	Passive House basics	15
5.2	Cost-efficient Passive Houses	16
<b>6</b>	<b>A Passive House for Every Chinese Climate</b>	<b>18</b>
6.1	Calculation tools	18
6.2	Description of the Reference Passive Houses	19
6.3	Climate Data	23
6.4	Comfort Requirements	23
6.5	General Findings for All Climates	23
6.5.1	Overview: Components and building parameters	24
6.5.2	Balconies	25
6.5.3	Ventilation	25
6.5.4	Distribution of Heating and Cooling	26
6.5.5	Kitchen, Ventilation of Kitchens and Internal Heat Loads	33
6.6	A Reference Passive House in 01 - Beijing: Cold	40
6.6.1	Characterizing the climate	40
6.6.2	Reference Passive House	40
6.6.3	Results	42
6.7	A Reference Passive House in 02 - Shanghai: Hot Summer Cold Winter	46
6.7.1	Characterizing the climate	46
6.7.2	Reference Passive House	46
6.7.3	Results	48
6.8	A Reference Passive House in 03 - Chengdu: Hot Summer Cold Winter	52
6.8.1	Characterizing the climate	52
6.8.2	Reference Passive House	52
6.8.3	Results	54
6.9	A Reference Passive House in 04 - Kunming: Temperate	58
6.9.1	Characterizing the climate	58
6.9.2	Reference Passive House	58
6.9.3	Results	60
6.10	A Reference Passive House in 05 - Guangzhou: Hot Summer Warm Winter	64

6.10.1	Characterizing the climate .....	64
6.10.2	Reference Passive House .....	64
6.10.3	Results.....	66
6.11	A Reference Passive House in 06 - Qionghai: Hot Summer Warm Winter .....	72
6.11.1	Characterizing the climate .....	72
6.11.2	Reference Passive House .....	72
6.11.3	Results.....	74
6.12	A Reference Passive House in 07 - Harbin: Severe Cold.....	78
6.12.1	Characterizing the climate .....	78
6.12.2	Reference Passive House .....	78
6.12.3	Results.....	80
6.13	A Reference Passive House in 08 - Urumqi: Severe Cold .....	84
6.13.1	Characterizing the climate .....	84
6.13.2	Reference Passive House .....	84
6.13.3	Results.....	86
6.14	A Reference Passive House in 09 - Lhasa: Cold .....	88
6.14.1	Characterizing the climate .....	88
6.14.2	Reference Passive House .....	88
6.14.3	Results.....	90
6.15	A Comparison of Results from Dynamic Simulation and PHPP Calculations .....	92
<b>7</b>	<b>Hygrothermal Considerations .....</b>	<b>94</b>
7.1	Cold Climates.....	94
7.1.1	Examined wall composition .....	94
7.1.2	Results of the hygrothermal analysis and recommendations .....	95
7.2	Climates with Hot Summers and Cold Winters .....	96
7.2.1	Examined wall composition .....	96
7.2.2	Results of the hygrothermal analysis and recommendations .....	96
7.3	Tropical Climates .....	98
7.3.1	Examined wall composition .....	98
7.3.2	Results of the hygrothermal analysis and recommendations .....	98
7.4	Overview of results and recommendations.....	101
<b>8</b>	<b>Passive House Components for the Chinese market.....</b>	<b>102</b>
8.1	Walls, Roofs, Slabs.....	102
8.2	Windows.....	102
8.3	Ventilation Units.....	103
8.4	Integrated Air Conditioning Systems.....	104
<b>9</b>	<b>References .....</b>	<b>106</b>
<b>Appendix A</b>	<b>Documentation of the Example Building.....</b>	<b>109</b>
A.1	General description .....	109
A.2	Building components.....	109
A.2.1	Opaque envelope.....	110
A.2.2	Interior building components .....	111
A.2.4	Windows .....	112
A.3	Ventilation.....	112
A.4	Air conditioning .....	113
A.4.1	Air conditioning via supply air.....	113
A.4.2	Air conditioning via a central split unit .....	113
A.4.3	Ideal air conditioning .....	113
A.5	Internal heat and moisture loads .....	114
A.6	Shading.....	114
