Passive House Exhibition 06

Registration

ON THE ROAD TO SUCCESS WITH THE PASSIVE HOUSE CONCEPT

PRESERVE VALUES

Building assets represent a significant capital stock in Europe. At the same time they are of cultural and social value. In view of the increased demands of people for comfort, the global requirements for climate protection and the expected further developments in energy prices their sustainable preservation requires maintenance and modernisation which is fit for the future. We have the means for this with the Passive House concept and Passive House technologies.

CREATE ADDED VALUE

If you do it, do it right – that is the motto with upcoming building measures, no matter whether it concerns a new building or modernisation of existing ones. This was realised even before the current very high energy prices: The additional investment in better windows, better thermal insulation, efficient heat recovery is worth it; not just because of the savings in energy costs, but also because of healthier living conditions and a more comfortable indoor climate, both in winter and in summer. The Passive House marks the present status of development with energy-efficient building and modernisation. Passive House components allow optimum cost effectiveness and at the same time maximum comfort. Everyone benefits from the added value: The users through low operating costs and high comfort, the owner through increased attractiveness of the building, the planner and the builder through increased added value, the economy through additional jobs and the environment through more protection of the climate.

SECURE FUTURE

Whether it concerns a new building or modernisation of existing buildings: Good energetic standards are a contribution to securing the future. Directly, through lower operating costs and the security against expected high price scenarios, through high quality building protection and excellent comfort – and also indirectly through domestic added value, employment and CO₂-reduction.

The detailed conference programme will appear in February 2006. Further information: www.passivhaustagung.de

The Passive House Institute invites you to submit contributions to the 10th Passive House conference. All important information for submitting Abstracts (criteria, format, submission form) can be found under www.passivhaustagung.de. Closing date for submissions for Abstracts is the 1st December 2005.

THE FOLLOWING KEY ISSUES ARE STIPULATED FOR THE CONFERENCE 2006:

1. Design, re-design, create leeway: Architecture with the Passive House
2. Discussion of the concepts: Passive - active – creative
3. Modernisation with Passive House components: Experience
4. Innovation from research and development: building technology and building shell
5. Surveys on and experiences with comfort
6. Passive House non-residential building
7. Implementation in the region and the municipal authorities
8. Financing for a sustainable future

INTERNATIONAL SESSIONS (ONLY ABSTRACTS IN ENGLISH ARE ACCEPTED)

9. Passive Houses in cold climates
10. Adaptation of Passive Houses to mediterranean climates
11. The integral workshop: How to design a Passive House in a specific climate
12. Getting started: Promotion of Passive Houses
13. Renovation using Passive House technology
14. Innovative envelope constructions, windows and doors
15. Innovative systems integration
16. Cost / Benefit analysis

As the leading exhibition of the Passive House industry it gives you comprehensive information about products, materials, new technical systems and processes of energy-efficient building and modernisation. Parallel to the 10th international Passive House conference the following companies present themselves at the exhibition

- Building companies, specialist federations, architecture and engineering offices,
- Manufacturers of windows, doors, ventilation systems and insulating materials,
- Providers of building parts, construction systems, technical services installations and solar companies.

They present building components and products which reach the top standards for energy-efficient building through high quality and innovative technology.

- Conference and exhibition take place directly next to each other in the HCC Hanover.
- A support programme of lectures is directed at conference and exhibition visitors. Here exhibitors can present their products and services.

We would be pleased to welcome you at the Passive House exhibition 2006.

Business Terms and Conditions

1. REGISTRATION

Registrations must be made in writing. They are binding and will be taken into account in the order in which they are received by the organiser. The number of participants is limited. After registration you will receive an invoice. The early booking discount is only granted if registration and payment have been carried out by 28.02.06. The participation in the conference is only possible when the participation fee has been paid in full. Cancellations of registration must principally be made in writing. In case of withdrawal of the registration by 28.04.2006 we will charge a processing fee of 70 €; the full participation fee will be due in case of later cancellation or non-appearance. It is of course possible to name substitute participants.

2. SERVICES

The scope of services includes: the conference proceedings with the presentations for the conference, lunch, coffee breaks. The organiser reserves the right to make any changes which may become necessary in the programme schedule.

3. CANCELLATION, RESTRICTION TO LIABILITY

In the event that the 10th Passive House conference has to be cancelled the participants will be notified immediately. In this case the organiser is only obliged to reimburse the already paid participation fee. The liability of the organiser is limited in any case to the paid participation fee.
